### AN INVITATION TO ATTEND

#### IT'S THAT TIME AGAIN!

EECOL Electric & Radiodetection Underground Utilities Locate Systems are proud to present our annual; **"The ABC's of Underground Utilities, Cable and Pipe Locating Seminars."**

Together, EECOL Electric & Radiodetection bring many years of knowledge, expertise and experience to our utility locate seminars. We believe you will find the sessions informative, and relevant to your organization. This seminar covers all the basic principles and theory of underground utility locating, will examine advanced locating techniques, and will discuss today's job site situations and problems faced by locating staff. The presentation is generic; the information is for all makes and models of locating equipment; it covers a wide range of industries, utilities & infrastructure.

For these reasons, the EECOL-Radiodetection Locating Seminars have become extremely popular throughout public works, construction, infrastructure & utility locating industries. Over the years the seminars have provided locating teams the skills to perform accurate and safe utility locating, winning the support and confidence of thousands of Municipalities, Companies, and individual field workers throughout Canada. **Seats are limited and go quickly. Don't hesitate, book today!**

#### A break down of the information covered is as follows:

- **Explanation of magnetic fields versus metal detection.**
- **Explanation of the types of locating methods.**
- **Discussion of field distortion.**
- **Methods of applying signal to target lines.**
- **Grounding.**
- **Locating Modes.**
- **Locating Issues.**
- **General & Advanced Locating Techniques.**
